

FINASTRA

End to End Treasury and Wealth Management Solution Overview

Executive summary

Finastra delivers the broadest portfolio of financial services software in the world today. Our vision is to unlock the potential of people and businesses across the financial ecosystem.

Our open platform brings ecosystem players together to collaborate, innovate, and build great customer experiences.

Finastra's solution provides capabilities across asset classes (Unit Trust, Pension, Repo, Equity, Bonds, Cambio, Loans, and Deposits) while ensuring adherence to policy with an oversight layer and evaluating liquidity under the guidance of BASEL.

Finastra relies on an unrivaled depth of expertise in treasury and capital markets, retail banking, payments, lending, and corporate banking.

IT spending trajectory (YoY % change - indexed to 100)

Scenario 1: Blip on the Radar – IT spending stays on track after initial freeze

- Budget increases are put on hold for 2020 with a shift to support work from home (WFH) measures (laptops, secured communications e.g., VPN/SD-WAN, etc.)
- As the pandemic's uncertainty fades in late 2020, firms revert back to pre-COVID-19 planned investments

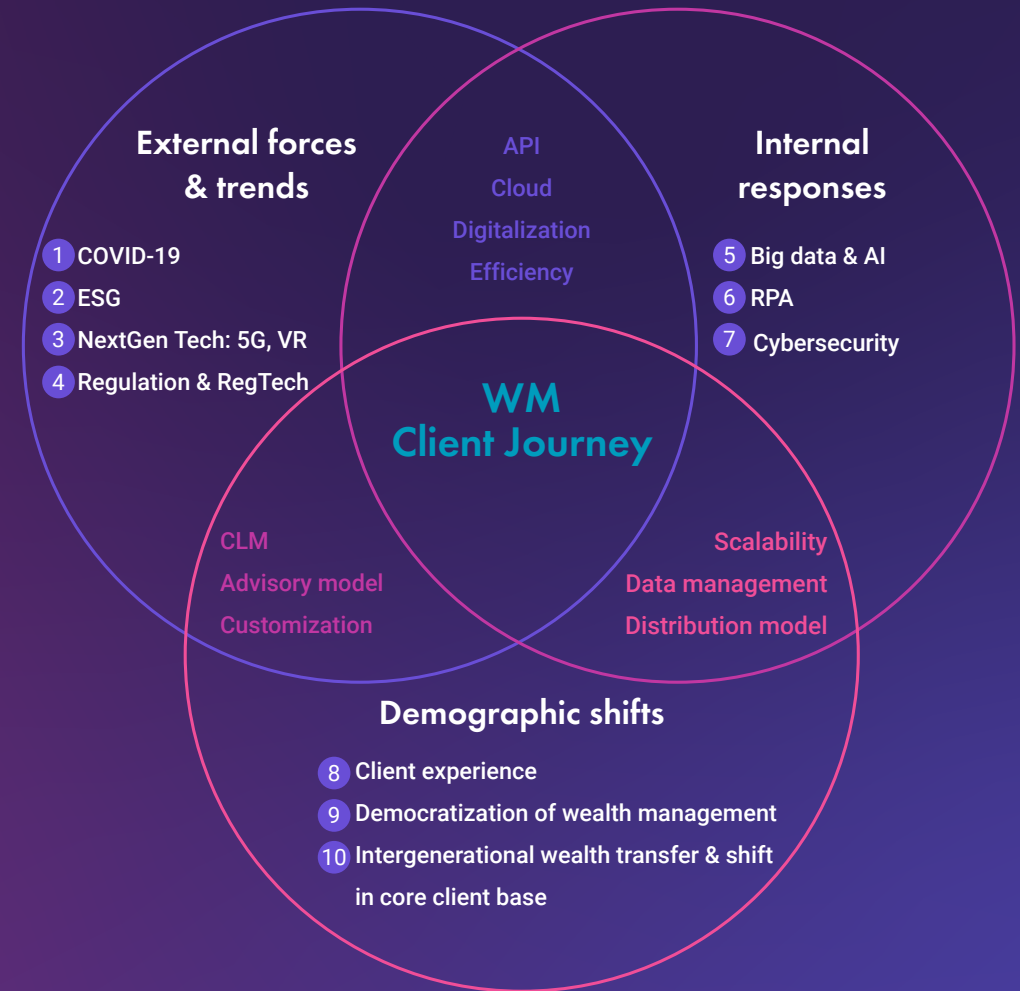

Scenario 2: Proceeding with Caution – Budgets stay on hold until the uncertainty surrounding the pandemic subsides by mid-2021

- The pandemic's effect on the economy is felt into 2021
- Decrease in revenues affect planned 2020 and 2021 IT spending increases
- Non-essential projects are put on hold. Resources are shifted to support digital capabilities that focus on client engagement
- IT spending gets back on track in 2022 with minor setback in 2020 and 2021

Scenario 3: Tighten the Belt – Extended period of economic contraction

- The pandemic's economic disruption continues throughout 2021
- Wealth Management revenue decline negatively affects future IT budgets
- Resources are primarily redistributed to support core business activities
- IT spending accelerates in 2022 to support neglected initiatives

Themes shaping the wealth management client journey

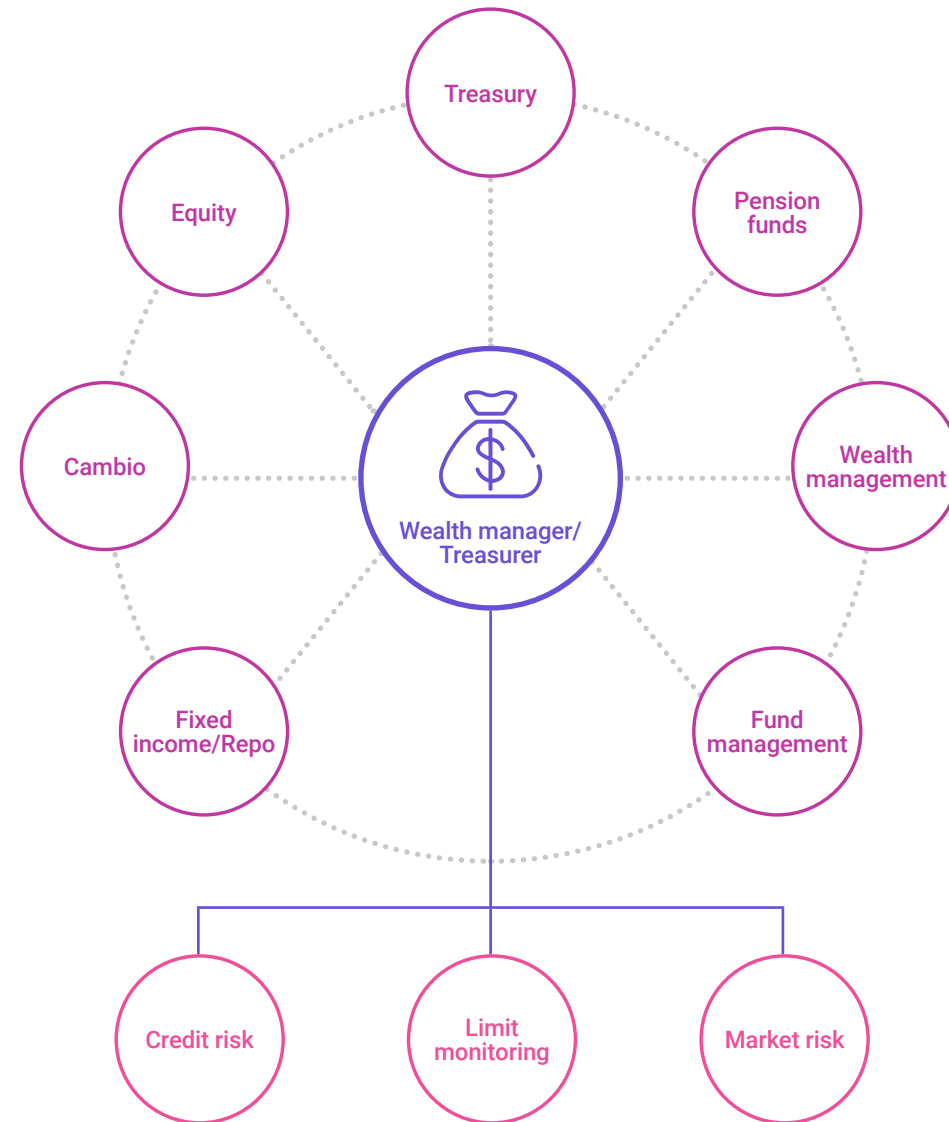

Celent identifies 10 interconnected trends affecting the wealth management industry. These trends are grouped into three broad categories: external forces and trends, internal responses, and demographic shifts. Whether or not the near future brings a return to normalcy, wealth managers should build on their hard-fought gains from this year and refocus on the secular trends that are inexorably changing the core of the industry.

Benefits

Finastra's pre-packaged Treasury and Wealth Management solution offers significant benefits

Tangible benefits are realized immediately with a pre-packaged solution covering several business areas, which is built upon a modern framework that supports growth, expansion, and the evolution of products and services.

Revenue growth

Systems need to be adaptable to support growth through **increasing volumes and new products**. A modern automated system can make it possible to pursue these growth opportunities. Finastra's solution can support expanded volumes, additional products/funds, and numerous currencies.

Risk Reduction

An automated system can **reduce exposure to potentially significant risks** and improve the ability to **view and manage those risks**.

Best Practices

With several users in the region, the solution continues to be more and more localized and clients are encouraged to interact and share experiences with the aim of achieving **simplification** of processes and procedures and **long term cost saving**.

Efficiency improvements

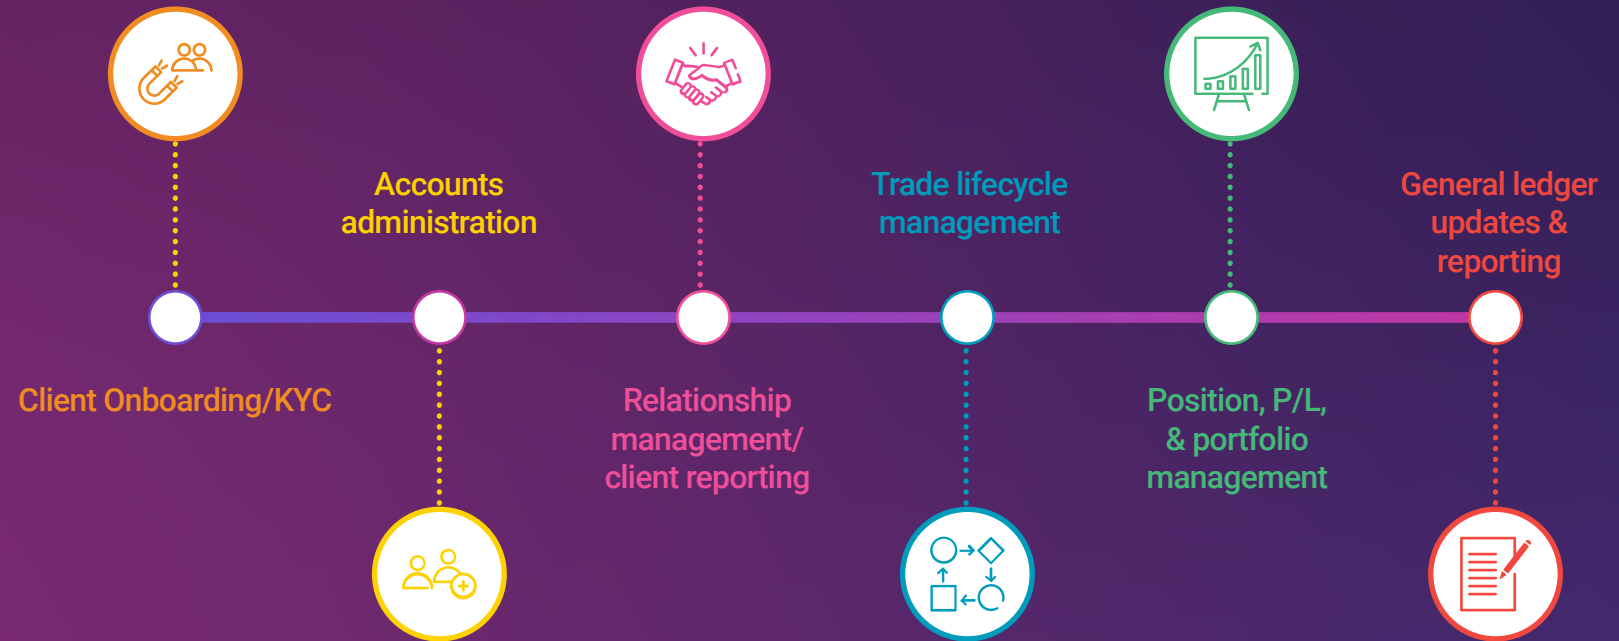

A modern system enables organizations to **increase automation, support new products, and reduce the complexity** of performing many tasks and functions.

End to End Coverage – Single Solution

Multiple Business Lines

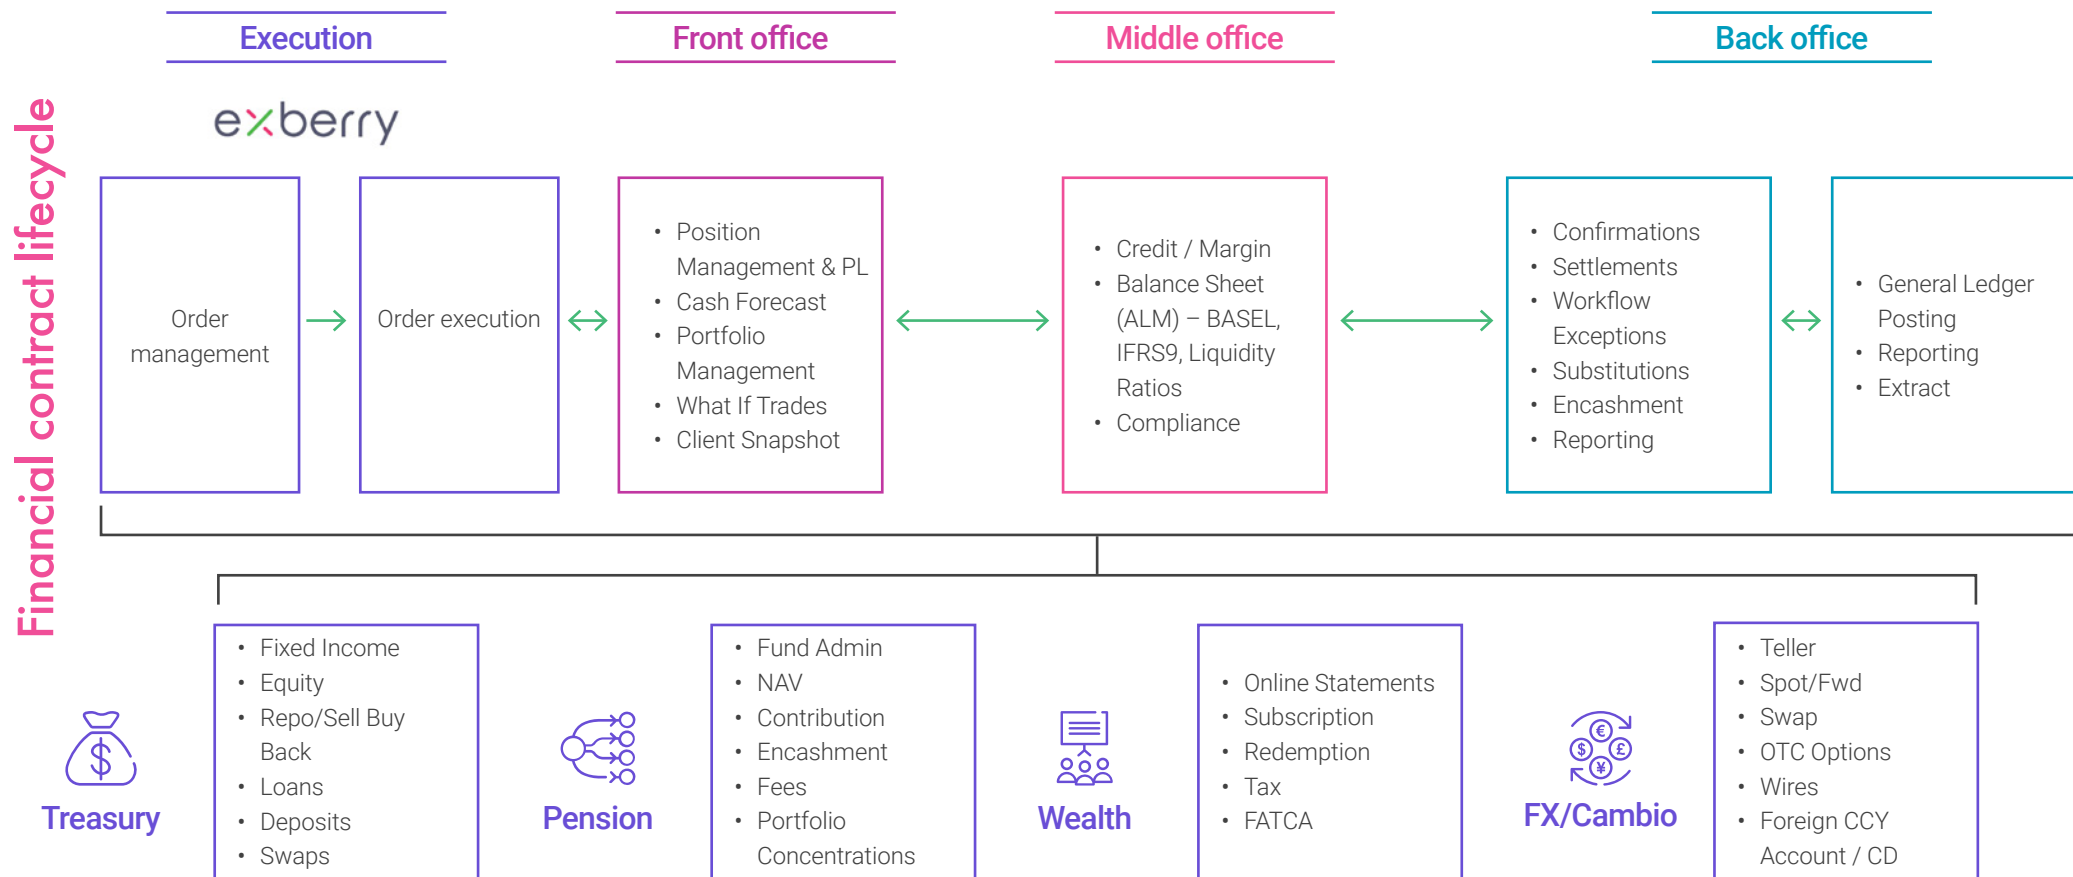

Finastra's solution provides end-to-end coverage from customer onboarding and due diligence to the administration of various financial products and services to GL updates and reporting. With capabilities that span different user groups within an organization such as Traders, Relationship Managers/Advisors, Fund Administrators, Operations, and Finance, the solution provides the breadth and depth that you need to be successful.

The Finastra Solution	Benefits	End-to-end coverage	Comprehensive capabilities	App Finder	Financial services provider evolution
-----------------------	----------	---------------------	----------------------------	------------	---------------------------------------

The breadth and depth you need

Finastra's solution enables different personas to perform the tasks required for their day-to-day activities across a wide range of financial instruments. You will notice that all front to back capabilities are provided across each of the business areas which provides consistency, efficiency, and accuracy as well as opportunities for collaboration since all users will be leveraging one solution.

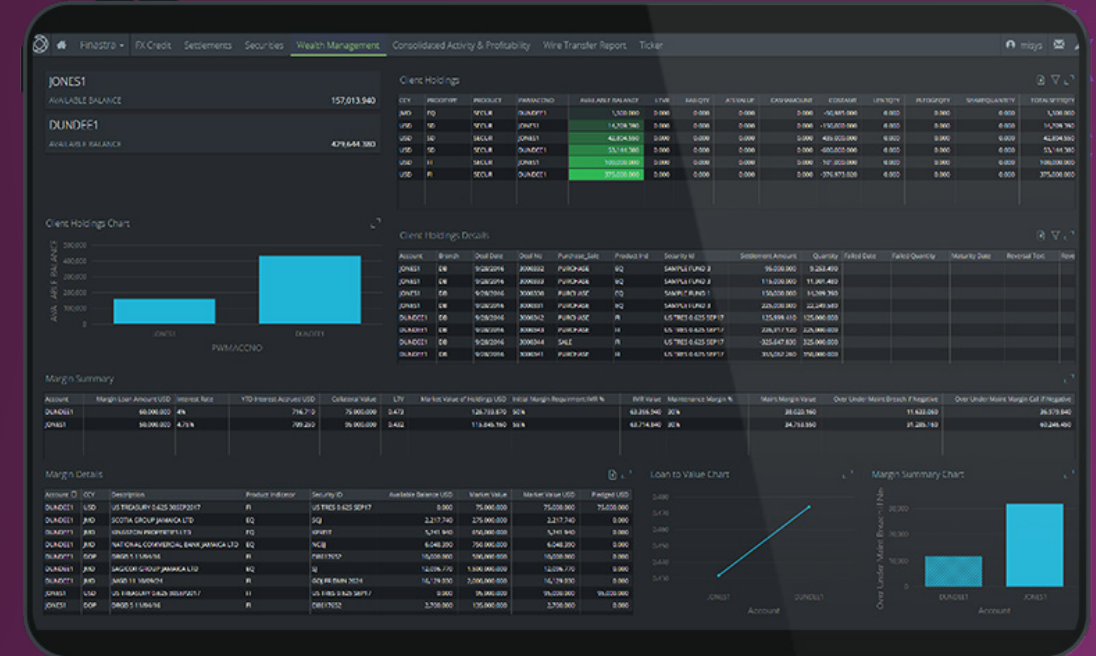

UXP - State of the art interface

Innovating for the future - configurable user interface

Finastra's solution comes with a 'Thin client' under the UXP layer, accessed through any HTML5 compatible device, such as a laptop, smartphone, or tablet.

This Reporting and Dashboard tool provides standard and user configurable views across all data elements and third-party data sources (warehouse, etc.) Views are interactive for slicing and dicing and foster collaboration amongst end users with the Import/Export feature. Since these are web based, they are accessible anywhere, anytime, on any device.

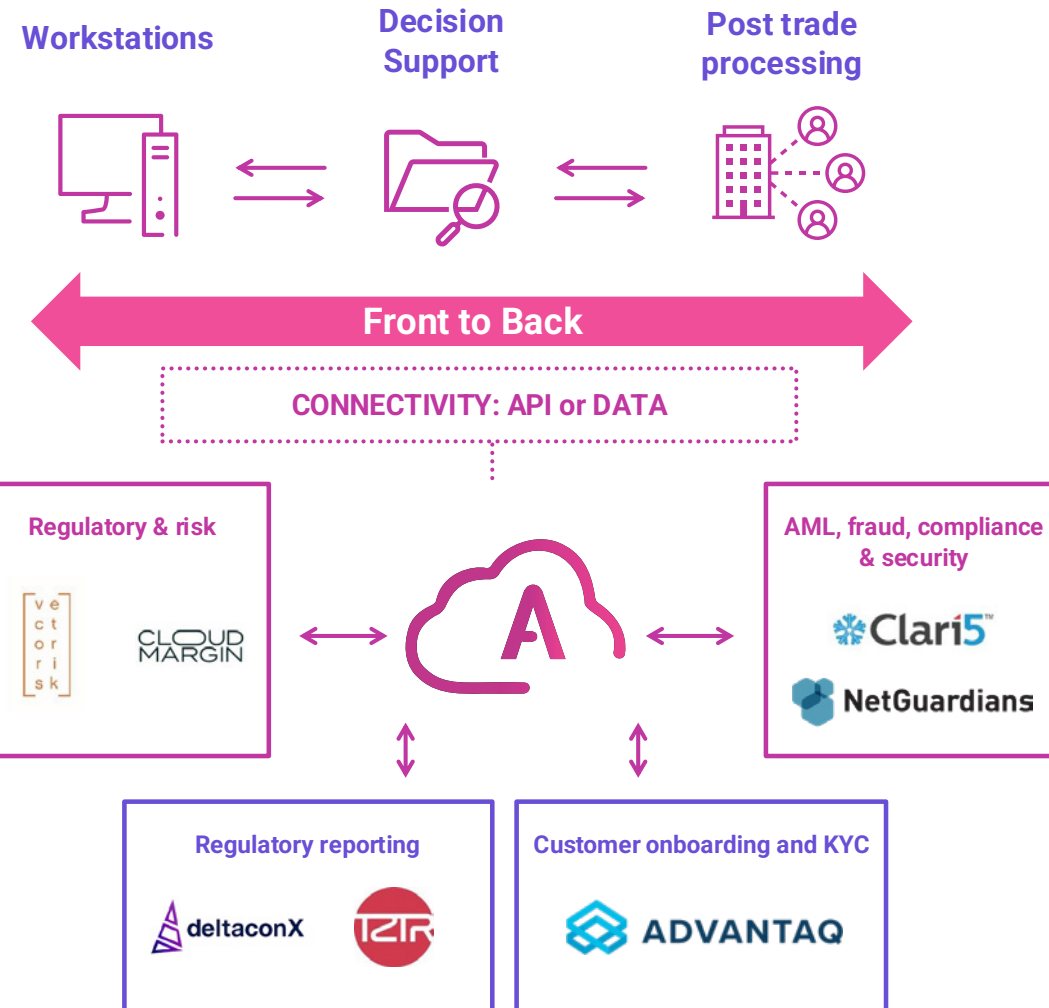

- ✓ Consolidated views from different sources
- ✓ Data aggregation
- ✓ Information distribution
- ✓ Best practices-based dashboards
- ✓ Intuitive navigation
- ✓ Customizable
- ✓ Risk mitigation
- ✓ Smartphone accessibility

App Finder

Finastra's vision is to unlock the power of finance for everyone. App Finder is Finastra's platform for the API Economy and our way into Open Banking. With App Finder, Finastra is delivering on our promise to become the #1 open platform in financial services, with Microsoft Azure being the foundational technology for App Finder. Azure gives us the most mature, robust, and scalable cloud infrastructure, with the global reach we need to make App Finder a success.

Finastra has evolved from packaged software to micro-services, open APIs and continuous delivery, made possible with platformification via open interfaces, standards and architecture.

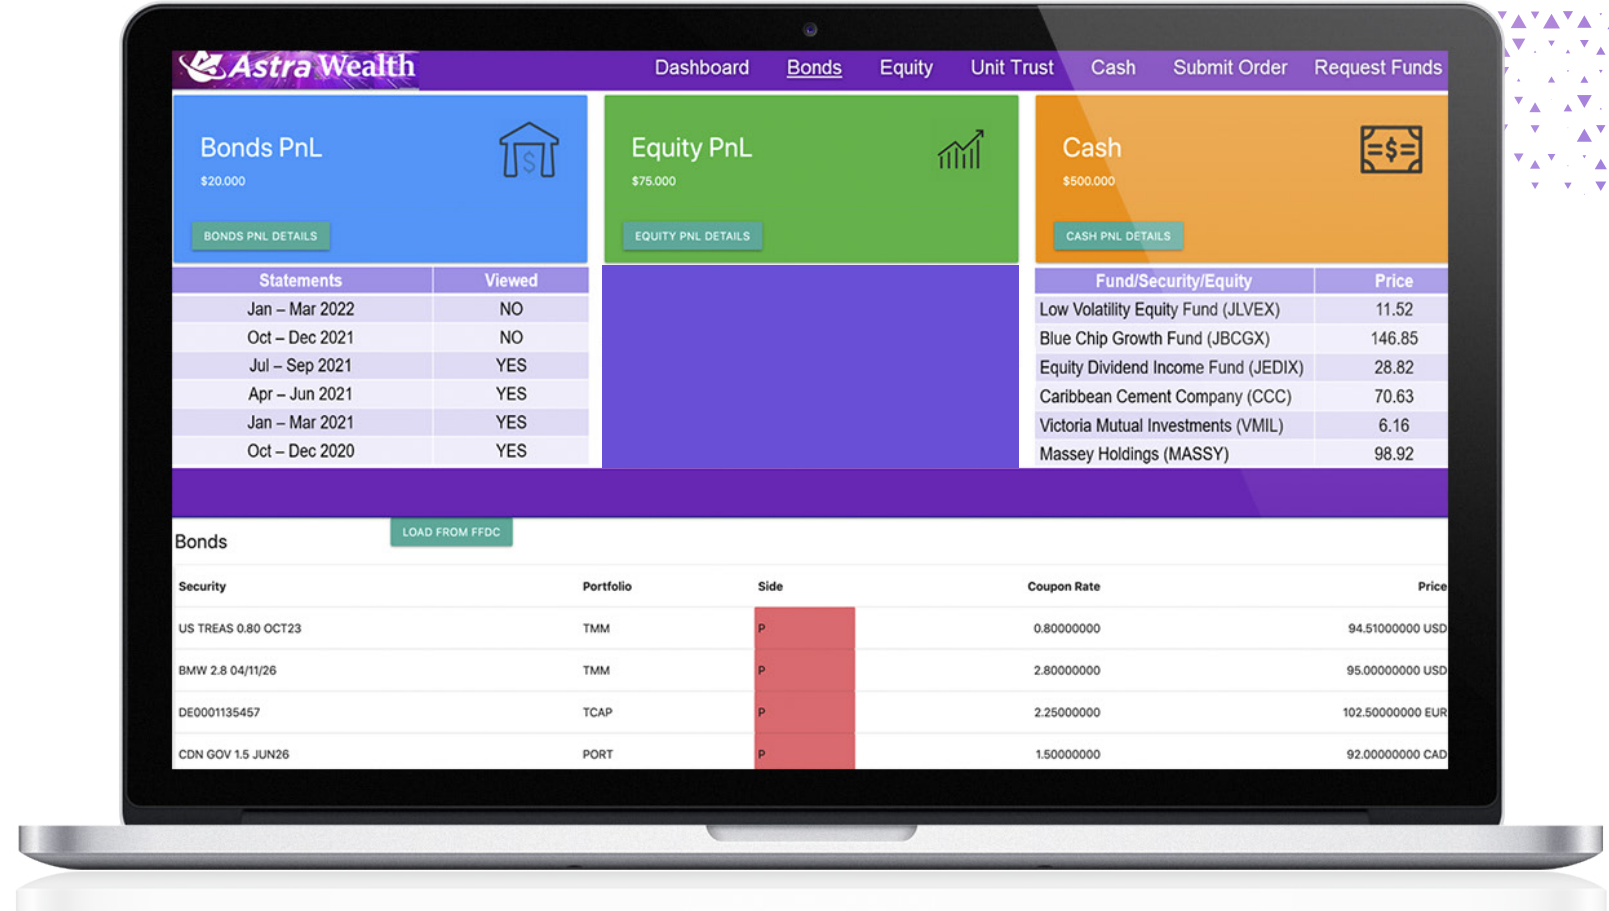

A major innovation for financial services, App Finder opens up Finastra's core systems via the platform to all players in the financial services ecosystem—banks, fintechs, system integrators, independent developers, consultants, students—enabling the development of a previously unachievable range of services.

Sample Prototype – Using the Opics Data Lake

Proof of the power of the App Finder platform, is shown with a sample online client portal (right) covering several investment or banking products and services.

Leveraging an off-the-shelf extract of data, which is mapped to a bespoke solution developed in-house or a 3rd party solution provided by a partner. Statements are updated near real-time and accessible anywhere and via any device. Additional capabilities can include Order Requests, Encashments, Payments, etc.

Opics Accounting

Highlight capabilities

Multicurrency

Multi entity

IFRS9

Value

Regulatory reporting

Entity specific books and records

Global best practices

The Opics Accounting module is designed to meet the complex accounting needs of financial institutions. With multi-currency and multi-entity capabilities, Opics ensures seamless financial operations across different geographies and business units. Opics is compliant with IFRS9, providing a solid framework for financial reporting and risk management.

The value of the Accounting module extends beyond its technical capabilities. It streamlines regulatory reporting and maintains entity-specific books and records, enabling organizations to adhere to various compliance standards with ease.

By incorporating global best practices, Opics not only enhances operational efficiency but also ensures that your financial operations are aligned with the highest industry standards.

In addition to these features, the Accounting module offers a strategic advantage by facilitating optimization for flexible deployment options. By running as a sub-ledger, Opics provides the flexibility to feed into your existing main general ledger application.

The tool brings clarity, compliance, and competence to your financial operations, positioning your institution at the forefront of financial innovation and excellence.

FINANCE IS OPEN

Finastra unlocks innovation across the world of financial services, through our trusted software and open platform.

About Finastra

Finastra is a global provider of financial services software applications across Lending, Payments, Treasury and Capital Markets, and Universal (retail and digital) Banking. Committed to unlocking the potential of people, businesses and communities everywhere, its vision is to accelerate the future of Open Finance through technology and collaboration, and its pioneering approach is why it is trusted by ~8,100 financial institutions, including 45 of the world's top 50 banks.
