

## Factsheet

# Introducing Kondor Assistant: an innovative chatbot that harnesses the power of artificial intelligence

Kondor Assistant enables treasury teams to access efficient, intuitive user interfaces and generate relevant, innovative content from natural language queries.

//

***With Kondor Assistant, we unlock unprecedented productivity. Integrated intelligence delivers real-time answers and a streamlined global workflow, enabling you to make informed decisions faster than ever."***

**Marc Massé**

Director of Product Marketing

From voice assistants to search engines, and from apps that help us apply for banking products to opening our phones with facial recognition, artificial intelligence (AI) is now a standard part of everyday life.

AI speeds up traditional manual tasks, reduces errors and simplifies access to complex data.

Kondor Assistant follows the accelerating AI trend. It helps treasury teams to navigate data sets within Kondor, a front-to-back, cross-asset treasury solution that helps treasurers to efficiently conduct the bank's funding, liquidity management, and trading activities.

Created specifically for Kondor, the new tool will redefine user experience and simplify intricate tasks, all powered by the transformative power of generative AI.

As a result, treasury teams can build on their successful use of Kondor and provide even more value to their organizations and their customers – helping to build market share, resilience and profitability

## Key benefits of Kondor Assistant

### Enhanced User Experience:

Kondor Assistant provides a seamless, interactive interface that simplifies navigation through financial data. Its ability to understand and respond to natural language queries eliminates the need for complex commands, offering a personalized, user-friendly experience.

**Efficiency:** By simplifying access to Kondor databases and executing APIs for complex tasks, Kondor Assistant can significantly speed up workflows. This allows users to focus more on decision-making and less on data retrieval and manipulation.

**Ease of Use:** Kondor Assistant understands and responds to natural language queries, making it as easy to use as having a conversation. This reduces the learning curve and makes the platform accessible to users of all skill levels.

**Inclusivity:** Kondor Assistant can understand and respond to queries in multiple languages, making it a truly universal tool. This promotes inclusivity by ensuring that users around the world can leverage its capabilities.

## How it works

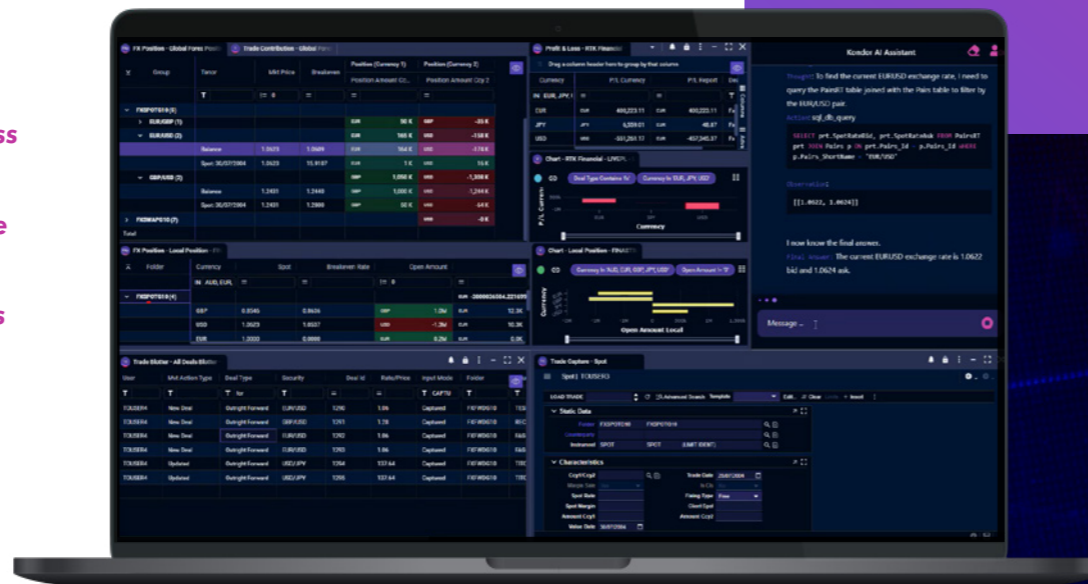

The Kondor AI Engine leverages Generative AI, Kondor databases, APIs and Kondor reports to provide real-time updates and answers to your queries. You no longer need to navigate multiple applications or know how to code. Now, you can access critical data efficiently, verify trade details, and stay informed—all thanks to the transformative potential of generative AI.

The Kondor Assistant is available in Kondor's new user interface, Kondor Vision.

Kondor Assistant will be made available in any module throughout front-to-back-to-risk system.

**Kondor Assistant brings a new level of efficiency and intuitiveness to financial trading and analysis. Treasury teams can now navigate effortlessly through more than 1500 tables, leveraging 100-plus report outputs and seamlessly interacting with 650 APIs."**

Meggie Grimaud,  
Head of Analytics, Finastra

## How can the Kondor Assistant help you?

Kondor Assistant uses generative AI to build more efficient and intuitive interfaces, and to create novel and relevant content from natural language inputs.

### Talk to your database

- **Streamlined Access:** Users can easily access Kondor data by simply typing their queries in natural language.
- **Market Data Quotes:** The assistant can provide real-time market data quotes, helping users stay updated with the latest prices.
- **Trade Details:** Users can retrieve detailed information about specific trades, including trade history, status, and other relevant details.
- **Enhanced Data Retrieval:** The assistant enhances data retrieval processes, ensuring a faster, more straightforward, and intuitive experience. Users can get the information they need without having to sift through large volumes of data manually. By simplifying these tasks, Kondor Assistant significantly improves the user experience, making data access and retrieval faster and easier.

### Ask for a report\*

**Kondor Assistant simplifies processes including:**

- **Data Extraction and SQL Generation:** Automatically extract data and generate SQL queries based on natural language input.
- **Report Generation:** Generate a wide range of reports, including those that amalgamate information from various sources and custom reports based on both analytical and static data.
- **Report Creation and Customization:** Create and customize specific reports effortlessly

### Run your API\*

**Kondor Assistant eases engagement with APIs to run tasks such as:**

- **PnL Calculation:** Execute APIs to calculate profit and loss, providing users with accurate financial insights.
- **Trade Booking:** Users can book trades seamlessly through the assistant, streamlining the trading process.
- **Risk Measures Computation:** The assistant can compute risk measures, helping users assess and manage financial risks effectively.

Kondor Assistant ensures that users have easy access to any API, enhancing their overall experience and efficiency.
