Integration is easy

Finastra's cutting-edge supply chain finance platform empowers banks and financial institutions to master the intricacies of global trade effortlessly.

Our solution integrates flawlessly with existing fintech systems, delivering a comprehensive and efficient approach to supply chain finance.

A better user experience

Our latest Trade Innovation update introduces improved SCF functionality, enabling seamless integration with third-party applications.

Open APIs streamline this integration, ensuring a smooth user experience and unlocking numerous opportunities for collaboration and expanded capabilities in supply chain finance.
