

FINASTRA

Expertise

One-time consultation services to maximize your bank's performance

Enhance your bank's operational efficiency when using Corporate Lending software, backed by Finastra's expert consultation services. Our services are designed to optimize the implementation and maintenance of Finastra solutions, whether you're upgrading software, addressing system performance and integration issues, or streamlining implementation.

Achieve smooth transitions and compliance with expert support

Impact Analysis

Upgrading Loan IQ can be complex, with unforeseen challenges such as compatibility issues, database modifications, and integration with various external systems and reporting tools. Finastra's Impact Analysis service helps Loan IQ customers enhance their software confidently, ensuring essential components continue to function seamlessly.

After reviewing all client-specific interfaces and reports interacting with the Loan IQ database, our team provides a detailed report assessing software compatibility with the new version and recommends modifications to ensure smooth integrations and optimal performance post-upgrade.

Application Health Assessment

Address escalations, meet critical deadlines, and resolve integration complexities and system performance issues for Loan IQ and Trade Innovation with our Application Health Assessment. Our Global Services team conducts a thorough evaluation of your current setup to identify pain points and areas of improvement, ensuring your business operates efficiently and effectively.

Through workshops and interactive sessions with your bank, we assess your solution's overall performance, including functional use, technical configurations, and integration. Over a six-week engagement, we deliver a tailored presentation with recommendations and estimates for proposed solutions, enabling your bank to maximize software potential.

Finastra Lending

Lending at scale

Eliminating friction and unlocking value across all aspects of lending and corporate banking.
